

Caller ID

Caller ID is an ever-evolving puzzle including:

1. National Database (ring-u does this part for you)
2. Apple Database
3. Google Database
4. Bing Database

It is **VITAL** that you complete your Apple, Google, and Bing business listings or your Caller ID will not function/display correctly for all parties.

Make sure your business listings include all the phone numbers on your [Dashboard](#).

The ring-u administered Caller ID can be edited by you at [Numbers](#)

Links for Apple and Google business listings:

[Apple Business Connect](#)

[Google Business Profile](#)

[Bing Places for Business](#)

Also, go to these pages and file your numbers as not spam. This is really important for any number that will call cell phones.
