

e911

Our e911 page is currently designed for businesses with one location. If you have multiple address covered within your phone system, we can set those up for you manually. Just open a support ticket through your portal or give us a call.

e911 Beacon

In many places: schools, hospitality/hotel, large facilities, it is possible for an extension to dial 911 for emergency services and no-one knows where to send them when they arrive. The front desk or receptionist area is not aware of the call.

We have addressed this problem by providing a “beacon” text message and email notification to alert your designated point person that an extension dialed 911. You can set an email address and a mobile phone number to receive these messages under My Account→Account Info. Provide a 10 digit phone number and/or an email address. It will send a message to either or both.

Please use 933 to test this feature

E911/911 limits
