

# ALGO 8180 Manual Config Example

Algo 8180 G2 is a good example of a manually configured SIP device useful as a loud ringer or external paging device (loud speaker). Create a manual configured extension for use as a ringer, and as a paging extension. This is 2 extensions per Algo 8180 G2 IF you want both “ringer only” and “PA”. There is a configuration screen on the ALGO for both accounts.

Setting changes have been saved and will be applied on the next call.

**SIP Settings**

**SIP**  
This section allows the SIP server information & account credentials to be entered. This information should be obtained from your telephone system administrator or hosted account.

SIP Domain (Proxy Server): 192.168.111.27  
(Default port is 5060. To specify a different port, enter PROXY:PORT, e.g.

RingAlert Mode:  
 Monitor "Ring" event on registered SIP extension  
 Only "Subscribe/Notify" dialog events (RFC 4235) to monitor event  
 Only "Subscribe/Notify" presence event (RFC 3864/3863 PDR)  
 None

RingAlert Extension: 162

Authentication ID: 162

Authentication Password: XXXXXXXXXX Change

Display Name (Optional): 162

(i) The device will detect inbound ring events on this extension and play the alerting tone (and multicast if configured) until the inbound call stops ringing. It will not answer the call.

Base/Page Extension: 164

Authentication ID: 164

Authentication Password: XXXXXXXXXX Change

Display Name (Optional): 164

(i) The device will auto-answer any inbound call received on this extension and provide a voice paging path (and multicast if configured).
