2025/11/02 17:50 1/1 Options

## **Options**

## **Basic Interface**

×

By default, all **ring-u** accounts are set to Basic Interface mode.

This works well for systems with automatically detectable and configurable phones.

## **Advanced Interface**

×

If you will be installing other VoIP phones requiring manual configuration, including "Softphone Applications" such as Zoiper or Grandstream Wave (or Lite) for mobile phones or computers, you will need to be in advanced mode. Advanced is also required for doorbell or public address integration, as well as systems which will require supporting phones via VPN or NAT'd networks.
