Payment

The **Payment** page captures your payment method and displays any payment methods already on file.

To add a card, select the **+ Add Credit Card** button and fill out the information as prompted.

Please note that editing a payment method already on file, such as updating the card's expiration date and CVV, will require you to re-enter the full card number. This is for your security.

Please also refer to Payment Policies *for a description of how your account will be handled if your payment method on file is removed or otherwise is no longer valid.*
