

Our Setup Wizard begins [here](#).\\Please remember before you begin:

-DO NOT begin this process unless you have all of your ring-u equipment on hand and ready to install. - Please plug your Hello Hub into power, and your network, so that it can grab any needed updates (do this now). -DO NOT log into any of your phones directly, or attempt to set passwords on your phones; this will break the auto-configuration process. -PLEASE: Only do what this setup guide asks you to do when it asks you to do it.
