

Call Parking

Call parking allows one user to put a call on hold in a way that the call can be picked up by any extension on the system.

Calls that are “parked” are not tied to any particular handset.

To park a call with ring-u:

- Transfer the call to extension 600
- Listen for the message that says what extension the call is parked with.
 - Calls are assigned to the first available extension starting with 601 and moving to 602, 603, etc.
- To retrieve the call, simply dial the extension (likely 601) where the call is parked from any handset on the system.
